

Access the training [here](#).

Follow the link to access a training PPT provided by SD Department of Health for SD-VDRS, SUDORS, and guidance on Coroner and Toxicology Reports.

LET will not be providing completion certificates for this training. You will need to maintain your own training hours to properly report the training received to your respective county in 2022.

This is step one of this year's annual Coroner training and will count to the 16 hours of initial training for new Coroners or the 8 hours of continuation training for existing Coroners.
