Survey Methodology

From June to August 2025, the South Dakota Division of Criminal Investigation's Statistical Analysis Center (SAC) surveyed Sheriff's Offices in the state. A survey, accompanied by instructions, was sent to all Sheriff's Offices via email attachment. This was the twenty-first time the SAC compiled statewide management data pertaining to South Dakota Sheriff's Offices.

The results of this survey are intended to provide sheriffs with a valid means of comparing expenditures and resources of offices across the state. In addition, the results can provide the sheriffs with a substantial basis from which to justify future management decisions.

Currently, there are 66 Sheriff's Offices in South Dakota (excluding tribal agencies). 48 offices returned surveys yielding a total response rate of 73%. The survey instrument is a self-report completed by the sheriff or office staff. All questions were designed to be objective; however, some questions may have been subject to different interpretations. Thus, this report can only reflect summary results that are as valid and accurate as the data provided by each office.

It should also be noted that salary data throughout this report are approximations. Due to the number of personnel at any given rank, and the diverse salaries relative to each officer, such approximations were necessary to perform overall summary calculations.

The survey only accounts for two divisions that a Sheriff's Office might manage: the law enforcement division, and the jail division. It should be noted that there are several other possible divisions controlled and managed by a Sheriff's Office that are not taken into consideration in the 2025 Sheriff's Management Study. The completed questionnaires were reviewed for completeness by the SAC.

How this study is organized

This 2025 Sheriff Management Study is organized to provide both a clear overview and detailed data for comparison across South Dakota Sheriff's Offices. The report presents statewide summary findings, highlighting key insights with graphics and benchmarks to help sheriffs compare resources and expenditures. These summaries are organized into thematic sections—such as staffing, expenditures, and operations—each paired with explanatory notes and visualizations. The final sections contain detailed tables of the raw survey data. Together, this structure allows readers to move from high-level insights to precise figures, using the report as both a quick reference and a comprehensive data resource.
